

WHO IS BIOPOWER?

BioPower Corporation specialises in Wastewater Treatment products, Technology, and Renewable Energy. This includes:

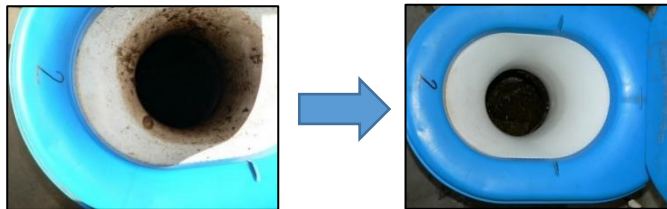

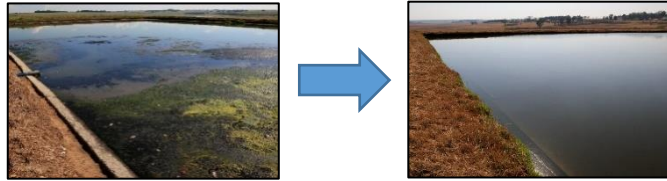

- ❑ VIP- and Traditional Pit Latrine/Urine Diversion Toilets/Septic Tank bioremediation and maintenance;
- ❑ Bioremediation and maintenance of Wastewater Treatment Works;
- ❑ Installation of Package Plants (FTS);
- ❑ BioScrub-UVGI Ultraviolet Germicidal units;
- ❑ BioCore SL10 Jet Mixer **and more.**

All BioPower products are non-toxic, E-coli free and safe to use around people, pets and wildlife while it continually works to improve and protects the environment.

The products are 100% natural, and because of the minimal processing also has the lowest hydrocarbon footprint on the market, making it a **Naturally Green** product.

All customers are incredibly satisfied, with over 200 testimonials being accumulated.

THE BIOSOL SL36 EFFECT

BIOSOL SL36 NATURAL MICROBIAL BLEND

For VIP- and Traditional Pit Latrines, Septic Tanks, Urine Diversion Toilets, Wastewater Treatment Works, Hospitals and Clinics, Schools and numerous other sectors.

WHAT IS BIOSOL SL36?

BioSol SL36 is a biological product that breaks down organic waste and eliminates bad odours in all sanitation systems.

Bacteria in BioSol SL36 have been tailored to ensure the most efficient and effective digestion process of organic matter.

Our **unique** biological sanitation blend:

- is non-toxic, non-poisonous;
- is 100% natural product;
- digests any organic waste;
- removes odours immediately;
- improves the environment back to its previous unpolluted state;
- is superior and more safe than chemical products;
- saves costs for individuals, companies, and ultimately local- and national government
- **create sustainable job opportunities (for 206 people per 20 000 pit latrines)**

Statement by BioPower Corporation:

THE BIOSOL SL36 SUCCESS STORY

Developed in 2008 by our environmental specialists, BioSol SL36 is a unique natural non-toxic product in our treatment solutions for any water and sanitation challenge. BioSol SL36 is 100% natural and was analysed by SANAS (SA) and approved by the Environmental Protection Agency (USA). We guarantee that our product will resolve sludge- and odour related sanitation challenges while addressing law requirements in this sector.

BioSol SL36 is an environmentally friendly, non-toxic product which will benefit all households, farmers, municipalities, industries, businesses, etc.

Become independent of hazardous chemicals and become part of a sustainable, workable solution to save our precious planet – BioSol SL36 solves today's challenges with tomorrow's technology.
